PREFACE.

It is with pleasure I present to the Medical Profession this, the Second Edition of my Illustrated Catalogue. It has been my earnest endeavor to acquaint the Surgeons of the Southwest with the increasing fullness of my *Surgical Department*. Month by month I am adding thereto to the end that every useful instrument or appliance may be found upon my list. Such instruments as are not priced may be ordered of me with the assurance that they will be promptly forwarded at the lowest price obtaining for the same quality. Recognizing the wide-spread demand for "Aseptic" instruments my stock is almost exclusively made up with metal handles and separable joints. No extra charge has been required, as may be seen from a comparison of prices. Too much stress cannot be put on the high quality of the instruments listed in this catalogue. I guarantee first quality throughout and will replace every defective instrument sent from my house. My aim is to furnish goods of the highest quality only, and not to compete with the irresponsible men who vend trash.

Believing that the time has come when a first-class Surgical house can live and prosper in the Southwest, I have undertaken to supply the long felt want; and when it is remembered that this is my fourth year in this line, the strides made will be instantly recognized.

Many of the best men all over the West have come to my aid with enthusiasm. And with gracious thanks to all who have patronized me, and indulging the hope that every man to whom this list comes may lend me his aid, I beg to remain,

Respectfully Yours,

A. P. CARY.

Please Observe the Following Directions in Ordering Goods.

- 1st. Write your town, county, state, and your name in a legible manner.
- 2nd. The prices quoted are strictly net, the only discount allowed is for cash, 1 per cent., in 10 days, or net 30 days.
- 3rd. Parties unknown to me must send references. This is a business precaution which is manifestly proper.
- 4th. Remittances must be made in such funds as can be used AT PAR in Dallas. Money, Express Orders or Exchange on Dallas or New York best serve the purpose of the transmission of money quickly and safely at a minimum expense.
- 5th. I assume no responsibility for the delivery of goods. After carefully packing and securing the receipt of the transporters selected by the purchaser, my legal and moral hazard ceases.
- 6th. *Goods sent by Mail are at Owners' Risk.*
- 7th. Packages weighing less than four pounds can be registered for an additional fee of (.08) eight cents. Express Companies also accept packages weighing less than 25 ounces and valued at \$10 or less, at Postal rates, or one cent per ounce, prepaid. I respectfully urge my friends to take advantage of the safer and at the same time inexpensive modes of transportation.
- 8th. State plainly whether to send by Mail, Express, Freight or otherwise.
- 9th. I am always glad to accord a hearing to any dissatisfied customer, and there will be no time limit to those claiming any redress whatsoever. I urge instant complaint for every short-coming of my house. It is the only method to bring carelessness to my attention.
- 10th. As an accommodation I will purchase at wholesale or retail any articles wanted, provided customers agree not to return goods except by permission.
- 11th. A reasonable charge will be made for preparing expensive packages for shipment.
- 12th. In sending instruments or packages to me write your name and address on them as a means of identification.

ANTISEPTIC SUNDRIES.

Superior Surgical Ligatures.

Patented July 10, 1888.
Fig. 44

Put up on glass spools, three spools (assorted sizes) in a neat bottle with a Nickel-plated Screw Cap.

The spools are so arranged on a hard rubber frame in the bottle that the ligatures may be drawn out through the cork as they are wanted for use; the cork being elastic closes tightly around the ligatures, thereby pressing all the surplus solution out of them and back into the bottle.

Three Sizes in a Bottle on Glass Spools.

No. 54*	Extra hospital size, (Fig. 5), each		1 75

ANTISEPTIC SUNDRIES.

Dr. G. R. Fowler's Aseptic Ligature Tube.

Ligatures boiled in alcohol under pressure. "The Ligatures by this method are rendered absolutely Aseptic after being hermetically sealed, and after all handling in the preparation has ceased."

Fig. 55.

The following advantages are claimed for this method:—

- 1. The catgut is rendered absolutely aseptic after all handling in the preparation has ceased.
- 2. It is hermetically sealed against all infection.
- 3. It is cut into suitable lengths for use.
- 4. The surgeon may re-sterilize the gut, if he so desires, by placing it in an oven heated to 185 deg. Fahr.

55*	Dr. Fowler's Tubes, Aseptic Catgut.	each,	25c
56.	" " " Silk Worm Gut	"	25c

58.	" " " Braided Silk	"	25c
59.	" " " Cable Twist	"	25c
60.	" " " Kangaroo Tendons	"	30c

"In employing this method (boiling in alcohol under pressure) for the sterilization of catgut, I wish to warn against attempting to combine the same with the use of chemical germicide. The addition of any of the usually employed antiseptic or disinfectant agents to the alcohol, or the placing of the gut therein, either before or after boiling in alcohol, will surely result, as I have repeatedly proved by trial, in disintegration of the gut."

Fig. 61.

Pure Virgin Silver Wire.

Heavy—Nos. 22, 23, 24. Medium—Nos. 25, 26, 27.
Fine—Nos. 28, 29, 30.

Put up 1 dwt. in coil.

---------	--------------------------------------	---------

EMERGENCY BAGS.

Fig. 225.

CARY'S EMERGENCY BAG.—No. 225.

This case has been arranged with a view to providing the Surgeon with the means for speedy preparation for an operation. In it are provided Antiseptics, Bandages, Ligatures and all the little accessories so necessary to both comfort and safety in those operations to which the surgeon is summoned at an instant's notice.

The cut illustrates the shape and general arrangement of the interior. The bag is made of dark grained leather, with nickel plated clasps and lock. Is lined with French calf of light color and can be thoroughly cleansed with a sponge. Loops extend down one side and around to the where a large pocket is fixed. On the under side of the lids are loops in which instruments to suit any given case may be carried. The bag may also be ordered in Alligator which adds \$5.00 to the price.

CONTENTS ARE AS FOLLOWS :

- 1 doz. Carbolyzed Sponges, in Screw Cap Bottle.
- 1 4 oz. Glass Stoppered, Metal Cover, Chloroform Bottle.
- 1 2 oz. Glass Stoppered, Metal Cover for Carbolic Acid.
- 1 Bottle Carbolyzed Drainage Tubes.
- 1 Bottle Corrosive Sublimate.
- 1 Bottle Cat Gut Ligatures, assorted sizes.
- 1 Bottle Silk Ligatures, assorted sizes.
- 1 H. R. Iodoform Box and Duster.
- 1 Instantaneous Tourniquet.
- 1 Nail Brush.
- 1 Box Hydronophthal Soap.

All instruments designated with a * are illustrated.

EMERGENCY BAGS.

CARY'S EMERGENCY BAG, No. 225.—Continued.

- 1 Pair Dressing Forceps.
- 1 Pair Esmarch's Bandage Shears.
- 1 Fine Razor.
- 1 Pus Basin, Papier Mache, small.
- 1 Pus Basin, Papier Mache, large.
- 1 Four quart Fountain Syringe with Esmorch's cut-off.
- 1 Esmarch's Bandage.
- 1 Heavy Canvass Roll, which may be washed at will.
- 2 Zinc Trays, which fit into each other and over outside of bag.

The Satchel has two straps with buckels which extend around the outside of the bag, and are so put on that when Satchel is closed are tight and hold on the trays, but, when open permit their being taken off without unbuckling them. With these contents there remains ample room for a compact Amputating Case, Kelly's Pad, Gynecological Roll, Sponges, Etc. Thus it will be seen my No. 225 Case contains only Dressing, Antiseptics, Ligatures, Etc., leaving the individual operator to supply instruments of his choice, using either those he has or ordering as the requirements of his practice indicate.

No. 225* Price \$35 00

EMERGENCY BAG.—No. 226

- Same outfit as No. 225, with the addition of
- 4 Pairs Hæmostatic Forceps.
 - 1 Aseptic Amputating Knife.
 - 1 Aseptic Saw.
 - 1 Aseptic Scalpel.
 - 1 Aseptic Liston's Open Joint Bone Cutting Forceps.
 - 1 Ferguson's Sequestrum Forceps.
 - 1 Kelley's Surgical Cushion.
 - 1 Baxter's Apron.
 - 1 lb. Roll Bandages.
 - ½ lb Cotton.
 - 1 Spool 2 in. Adhesive Plaster, 10 yds. long.
 - 1 yd. Gutta Percha Tissue.

No. 226 Price \$45 00

EMPTY EMERGENCY BAGS.

- No. 227. Cary's Emergency Bag, empty, with 17 inch Zinc Trays \$10 00
- No. 228. Cary's Emergency Bag, empty, with 17 inch Zinc Trays, Genuine Alligator \$15 00

NOTE.—Those who prefer may substitute Soft Rubber Trays for Zinc. The Rubber can be rolled up and put inside.

EMERGENCY BAGS.

Fig. 229.

The Antiseptic Satchel here shown is one which has been used in general practice for several years, and we have no hesitation in saying that it contains all the appliances necessary for the antiseptic treatment of any capital, accidental, or operation wound. It has also the advantages of lightness and portability. It contains the following items :

- 2 ounce jars Carbolic Acid, crystals.
- 1 bottle Corrosive Sublimate Tablets.
- 5 yards Sublimated Gauze in tin case.
- 6 Roller bandages, assorted.
- 1 Patented Package Assorted Cat-gut, on reels.
- 1 Patented Package Assorted Silk, on reels.
- 1 Tin Flask for Anaesthetics.
- 6 Assorted Rubber Drainage Tubes in vials.
- ½ Ounce Iodoform in Hard Rubber Sprinkler.
- 1 Razor.
- 1 Nail Brush.
- 1 Cake Soap in Case.
- 1 Imp. Hard Rubber Irrigating Apparatus.
- 1 Roll 1-inch Rubber Plaster, 10 yards.
- 2 Ounces Absorbent Cotton.
- 1 Leather Bag, 16-inch Frame.

CARY'S OPERATING CASE.

Fig. 707.

This cut represents our "Carys" Case. It is covered with imitation alligator leather, and lined with a superior grade of light leather. It fastens with two slide bolts. The Instruments in the top are protected by a cushion board. The Knives are "hand forged" and warranted.

CONTAINS :

- | | |
|----------------------------------|---|
| 1 Amputating Saw. | 1 Amputating Knife. |
| 2 Scalpels. | 1 Finger Knife. |
| 1 Tenotome. | 1 Curved Sharp Bistoury. |
| 1 Hernia Bistoury. | 1 Tenaculum. |
| 1 pair Curved Scissors. | 1 pair Slide Catch Artery and Needle Forceps. |
| 1 pair Pean's Artery Forceps. | 1 pair Bone Forceps. |
| 1 Esmarch's Bandage and Chain. | 1 Director and Aneurism Needle. |
| 1 pair probes, Needles and Silk. | |

No. 707* Cary's Amputating Case \$20 00

We can furnish above case with all the instruments in metal racks, which can be removed from the case, and instruments and rack asepticised together, for \$2 50 additional.

All instruments designated with a * are illustrated.

LEONARD'S MINOR OPERATING CASE.

Fig. 708.

CONTAINS:

- | | |
|-----------------------------------|---|
| 1 Matarpel Saw. | 2 Scalpels. |
| 1 Finger Knife. | 1 Curved, Sharp-pointed Bistoury. |
| 1 Curved, Blunt-pointed Bistoury. | 1. Hernia Knife. |
| 1 Tenotome Knife. | 1 Aneurism Needle. |
| 1 Tenaculum. | 1 pair Haemostatic Forceps. |
| 1 pair Straight Scissors. | 1 pair Curved Scissors. |
| 1 Bone-cutting Forceps. | 1 Fenestrated Artery and Needle Forceps |
| 1 Director. | Combined. |
| 1 pair Silver probes. | Needles and Silk. |

All fitted into a leather lined and carved case, 8x4½x1½ inside measurements.

No. 708* Leonard's Minor Operating Case \$20 00

GENERAL OPERATING CASES.

Fig. 709.

This cut represents our "Satchel" Compact Minor Case. It is covered with smooth, light-colored leather in such a way that no seams show, and the leather is of the same quality that some other manufacturers call "sole-leather." It is lined in light leather, and the arrangement of the instruments is clearly shown in cut. Remember special advantages in each of the following cases. Metal Corners; Metal handle fastenings; Hand-forged knives; Quality guaranteed; The most for the money.

SACHEL NO. 709 CONTAINS :

- 1 Amputating Saw.
- 1 Amputating Knife.
- 1 Amputating Catlin.
- 2 Scalpels.
- 1 Finger Knife.
- 1 Tenotome.
- 1 Curved Sharp Bistoury.
- 1 Curved Blunt " "
- 1 Hernia Bistoury.
- 1 Tenaculum.
- 1 Aneurism Needle.
- 1 pair Curved Scissors.
- 1 pair Slide Catch Artery Needle Forceps.
- 2 pair Pean's Artery Forceps.
- 1 pair Thumb Forceps.
- 1 pair Bone Forceps, Aseptic Joint.
- 1 Esmarch's Bandage and Chain.
- 1 G. S. Director.
- 1 pair Probes.

SACHEL NO. 711 CONTAINS:

- 1 Amputating Saw.
- 1 Amputating Knife.
- 2 Scalpels.
- 1 Finger Knife.
- 1 Tenotome.
- 1 Curved Sharp Bistoury.
- 1 Hernia Bistoury.
- 1 Tenaculum.
- 1 pair Curved Scissors.
- 1 pair Slide Catch Artery Needle Forceps.
- 1 pair Thumb Forceps.
- 1 pair Pean's Artery Forceps.
- 1 pair Bone Forceps.
- 1 Esmarch's Bandage and Chain.
- 1 G. S. Director.
- 1 pair Probes.
- Needles and Silk.

No. 709* Compact Case	\$27 00
No. 710 Same as No. 709 with Trephine and Elevator	30 00
No. 711	22 50

We can furnish either of above patterns with all the instruments in metal racks, which can be removed from the case, and instruments and rack asepticised together, for \$2 50 per case additional.

All instruments designated with a * are illustrated.

CARY'S AMPUTATING AND TREPANNING CASE No. 712.

Fig. 712.

CONTAINS:

MINOR OPERATING CASES.

CARY'S POCKET SETS OF MINOR OPERATING KNIVES.

To supply the demand for sets of Minor Operating Knives, I am prepared to furnish the following in German Silver Case—sets of 4 or 6 knives, of any selection, with hollow German Silver handles.

No. 713 Cary's Set of 6 Minor Knives, 3 Scalpels, 1 Finger Knife, 1 Bistoury
Straight, Probe Point, 1 Tenotome \$7 00
No. 714 Cary's Set 4, 1 Scalpel, 1 Curved Bistoury, Tenotome and Finger Knife . . . 5 75

CARY'S EMERGENCY OPERATING AND DRESSING CASE.

Fig. 715.

In presenting to the profession our Emergency Operating and Dressing Case, we have met, and we think, overcome some of the objections found with all those in use. The accompanying sketch give a faithful representation of the case opened, and convey a much better idea of it than any description. It is 17 inches long, $4\frac{1}{2}$ inches wide, and $6\frac{1}{2}$ inches high, when closed. It is covered with fine black leather, has slide bolt catches and lock and key, velvet covered flaps protect both instruments and dressings, (not shown in the cut.) When in the case the knives are always in one position and can never be thrown upon their edges. The case is arranged so compactly, that while not exceeding the ordinary size, still a large space is saved for dressings. The contents selected by a surgeon of long experience, are as follows:

- | | |
|---|---|
| 1 Amputating Saw. | 1 Amputating Knife, long. |
| 1 Amputating Catlin, medium. | 1 Amputating Knife, medium. |
| 1 Amputating Scalpel. | 1 Bone Gouge. |
| 1 pair Cutting Bone Forceps. | 1 pair Bone Forceps, Sequestrum. |
| 1 Bullet Probe. | 1 Galt's Trephine. |
| 1 Key's Saw. | 1 Trephine Elevator. |
| 1 Pair Parker's Retractors. | 1 Metacarpal Saw. |
| 1 Fine Scalpel. | 4 Fine Bistouries. |
| 1 pair Bullet Forceps. | 1 Hydrocele Trocar. |
| 1 Director and Tongue Tie. | 1 Aneurism Needle. |
| 1 Fine Tenaculum. | 1 pair Scissors. |
| 1 pair Pean's Haemostatic Forceps. | 1 pair Fine Artery Forceps. |
| 1 pair Bull-dog Artery and Needle Forceps, Combined. | 1 Spiral Tourniquet. |
| $\frac{1}{2}$ yard Gutta Serena Tissue; Silver, Silk. | $\frac{1}{2}$ yard Oil Silk; 3 yards Gauze. |
| 8 Roller Bandages; 1 Tin of Plaster. | Suture Needles, Hare-lip Pins. |

No. 715* Cary's Emergency Operating and Dressing Case \$55 00

NOTE.—An Esmarch's bandage for bloodless operations may be substituted for the Spiral Tourniquet.

LEONARD'S ASEPTIC GENERAL OPERATING CASE.

Fig. 716

The above Case is made of Rosewood, lined with leather, $14\frac{1}{2} \times 4\frac{1}{2} \times 2\frac{1}{4}$ inside measurements.

CONTENTS:

- | | |
|--|-------------------------------------|
| 1 Long Amputating Knife, Metal handle. | 1 Pair American Bullet Forceps. |
| 1 Medium Amputating Knife, Metal handle. | 1 Trephine Elevator and Raspatory. |
| 1 Medium Catling, Metal handle. | 1 Heys' Saw, Vulcanite handle. |
| 1 Amputating Scalpel, large, Metal handle. | 1 Nelaton Bullet Probe. |
| 1 Spiral Tourniquet. | 1 Fenestrated Artery Forceps. |
| 1 Conical Trephine. | 1 Steel Round-head Chisel. |
| 1 Bone-Cutting Forceps, double Concave, Leonard's. | 1 Sequestrum Forceps. |
| | 1 Amputating Saw, Vulcanite handle. |

The minor instruments are fitted into a neat, light, leather-covered and leather-lined case that can be removed from the case and carried separately if desired, which is a great advantage over the old style of cases.

MINOR CASE CONTAINS:

1 Metacarpel Saw, 3 Scalpels, 1 Curved sharp-pointed Bistoury, 1 Curved Probe-pointed Bistoury, 1 Finger Knife, 1 Hernia Bistoury, 1 Tenaculum, 1 Artery Needle. All the above with Vulcanized Rubber Handles, perfectly smooth. 1 pair Scissors, curved up, 1 pair straight Scissors, 1 Allis Hæmostatic and Needle Forceps combined, 1 Thumb Forceps, 1 pair silver Probes, 1 director.

Case $8\frac{1}{4} \times 2 \times \frac{7}{8}$, made of solid piece metal, highest quality.

No. 716 Leonard's Aseptic General Operating Case \$45 00

CHAMPION HYDRAULIC AIR COMPRESSOR AND RECEIVER

AS USED BY PHYSICIANS.

The accompanying cut shows Champion Hydraulic Air Compressor connected to No. 1550 Air Receiver, which is intended for use in a Physician's office. The Air Storage Reservoir and the Hydraulic Air Compressor can be attached in any convenient place, but if the water pressure, which is to operate Compressor, is a low-pressure water service, the Compressor should be connected in the basement, or at the lowest possible, so as to obtain the greatest volume of air that can be pumped with a low-water pressure. *It is not necessary to place Compressor and Air Reservoir in the same room.*

THIS OUTFIT CONSISTS OF:

- 1 Champion Hydraulic Air Compressor with water Regulator attached.
- 1 Air Receiver, handsomely decorated, diam. 12 inches, height 36 inches.
- 1 Air Inlet Valve to Receiver.
- 1 Air Outlet Valve from Receiver.
- 1 Air Regulator to regulate the air pressure as it leaves the Receiver.
- 1 Air Gauge, to indicate the pressure that goes to the Spray Tubes.
- 1 Blow off Cock, at lower side of Receiver.
- 5 Feet of Air Tubing to connect Compressor to Receiver.
- 6 Feet of Silk-covered Tubing to connect Gauge to Spray Tubes.
- 1 Set of Three Davidson's Sprays.
- 1 Davidson Cut-off.

No. 1550 Champion Hydraulic Air Compressor, complete, with Spray Tubes and Cut-off \$ 57 50

All instruments designated with a * are illustrated.

SIZE OF RECEIVER,
36 inches high, 12 inches in
diameter.
1551

This Receiver is made of superior steel, and is decorated and finished in a highly artistic manner. It is the only Receiver yet introduced that is supplied with our Patent Air Regulator and Shut-offs.

The Air Regulator controls the outflow of air from the Receiver, and an Air Gauge is used to indicate the pressure as it is supplied to the Spray Tubes.

Guaranteed not to leak.

To be used in connection with Champion and Monitor Hydraulic Pumps.

No. 1553 Receiver, with all attachments here shown \$28 50

This Receiver is made of the same material as our No. 1551, and has identically the same superior decoration and finish.

The air is supplied to this Receiver through Air Cock in the side of Receiver, by use of the No. 10 Hand Pump, (see page 112).

The extra Shut-off at the top, as shown in the cut of the No. 1552 Receiver, is not necessary for an outfit with the No. 1557 Pump attached. This is the only difference between the attachments of these Receivers.

For use with hand pump.

No. 1551 Air Receiver, for use with hand pump,
(as shown in cut) \$27 00
No. 1552 Air Receiver alone 15 00

SIZE OF RECEIVER,
12 inches in diameter, 36 inches high.
1552

THE CHAMPION HYDRAULIC AIR COMPRESSOR.

Especially Designed and Constructed for Physicians' Use.

We quote the following from a letter recently received: "This simple apparatus is a great boon to all who use compressed air in any form and have heretofore depended on acquiring the same by means of the ordinary air pumps. It is a highly finished nickel-plated cylinder, not much larger than the ordinary T hand pump, and is automatic and noiseless in its action. The pressure of air is equal to the water pressure of the system to which it is attached, but it may be reduced to any desired amount by means of the regulator, indicated in the illustration as 'water regulator.'

"No water is wasted, as the Compressor ceases to operate when the Receiver is filled, but will again begin to work as soon as the pressure in the receiver has been reduced."

DIRECTIONS FOR CONNECTING AND USING THE CHAMPION AIR COMPRESSOR.

Connect the water system with the opening of the Champion Compressor, marked 'water inlet,' and then carry a pipe from the opening marked 'water outlet' to the waste pipe. The nipple on top of the Compressor, marked 'air outlet,' is then connected with the air receiver by means of a rubber tube, like an ordinary pump, and the Compressor is ready for operation and will keep the receiver filled with compressed air of the same pressure as is furnished by the water system.

The pressure can be reduced proportionately by screwing up the water pressure regulator.

The compression of air is accomplished by the water forcing up a piston which forces the air out at 'air outlet,' when, by the automatic closing of a valve, the water is evacuated through the water outlet, which process is repeated until the pressure in the receiver is equal to the water pressure of the water system.

No. 1554 The Champion Hydraulic Air Compressor \$26 25

We also carry the Monitor Air Compressor for low water pressures, and where small space is to be utilized. Special Catalogue on application. Price is same as No. 1554.

All instruments Designated with a * are illustrated.

1555

1556

Fig. 1555 represents our Air Receiver and Pump combined. The base, column and fly wheel are made of iron, japanned in black and ornamented in bronze; the height is 42 inches, base 14 x 24 inches, and wheel 24 inches in diameter. The Pump and Air Receiver are made of brass, and nickel-plated. The Air Receiver is 32 inches high and 9 inches in diameter, provided with a 50-pound gauge and two exhaust valves, tested to 100 pounds hydraulic pressure, warranted air-tight.

The Pump has excellent valves, thereby greatly increasing its working capacity. The chamber is 2 1/8 inches in diameter by 7-inch stroke.

- No. 1555 Combined Air Receiver and Pump, with one set Davidson Sprays and Cut-off, with Tubing, etc., complete \$63 50
- No. 1556 Pump, same as in Fig. 1555, but on separate base, as shown in cut \$35 00

No. 1557 HAND PUMP.

This cut shows our No. 1557 Hand (or Incline Plane) Pump, which stands 28 inches high by 2 1/8 inches in diameter, and is also highly polished and nickel-plated.

- No. 1557 Hand Pump, for use with Air Receivers Nos. 1557-1559-1560 \$ 9 00
- No. 1558 Smaller Pump, Nickel-plated 7 50

1557

1559.

BOEKEL AIR CONDENSOR, NO. 1559.

Receiver 22 in. high, 10 in. in diameter, tested to 100 lbs. Warranted air tight and to stand maximum pressure of 100 lbs. Pump is 21½ in. high, mounted on neat wood base, 6x12; has excellent valves. Size 2 in. and 16 in. stroke.

No. 1559 Complete with receiver, pump and gauge with 4 feet lined tubing and 4 feet silk covered tubing, set Davidson's sprays and Davidson's cut-off . . . \$28 25

1560.

BOEKEL DOUBLE AIR CONDENSOR, NO. 1560.

Same as No. 1559, except has 2 exhaust valves on receiver and 2 tubes to connect to spray.

No. 1560 Complete with 1 cut-off and 1 set Davidson's Sprays, Tubing, Etc . . . \$30 00

GYNÆCOLOGICAL BAGS.

2425

2450

The style No. 2425 is a shallow bag, 5 inches in depth and 5 inches in width, made in various lengths to meet the convenience of the physician. In style and appearance it is like a first-class traveling bag, with steel covered frames, nickel springs, double hasp lock with key, nickel name plate, etc. It is made of the finest grained stock, lined with smooth leather, inside pocket on one side. Made neatly, and well adapted to the purpose intended. Figure 2450 is same as No. 2425 without glass stoppered bottles.

No. 2477	17 " "	. 12 00
Black or brown, complete with roll and bottle.		

The Aseptic Obstetrical Bag, No. 2490.

Square, Cabinet Bag Style, 5 3/4 inches wide, 6 inches high, 15, 16 or 17 inches long. Opens on top; no gussets hence no waste of space when closed. Made of best grade of Bag Leather, leather covered steel frame with full, Nickel trimmings, and lined with smooth leather, which allows the inside to be cleaned with a moist sponge when ever necessary, making the Bag as near aseptic as an article of this kind can be made. It is the stroughest, neatest, most cleanly, and cheapest Obstetrical Bag of its kind on the market. It will outwear three of the ordinary bags.

MODEL MICROSCOPE.

2550

The tripod base, pillars and arm, are neatly japanned; the axis is arranged with strong bearings to allow inclination of the body to any angle. Coarse adjustment is by perfect rack and pinion, provided with tightening screws; fine adjustment by a delicate micrometer screw, acting on our patent movement.

The stage is of brass, circular in form, thin to allow great obliquity, but of sufficient strength to be firm under manipulation. Attached to its lower side is a sub-stage ring and dome diaphragm, both of which may be removed.

The main tube is arranged with cloth lining in which the graduated draw-tube is fitted; it is provided with the society screw. Plane and concave mirrors are of large size, adjustable on the mirror-bar; the mirror-bar swings on a bearing (the axis of which lies in the plane of the stage) to any obliquity below and above the stage, the latter for the illumination of opaque objects.

Eyepieces are the Huyghenian, objectives of Series II, unless otherwise stated.

Upright polished case with drawer for accessories and receptacles for eyepieces and objectives, with handle and lock, accompanies the outfit.

No. 2550*	Stand with 1 eyepiece (any power)	\$25 00
No. 2551	Stand with 1 eyepiece and $\frac{3}{4}$ in. and $\frac{1}{2}$ in objectives	48 00
No. 2552	Stand with 1 eyepiece and 2 in., $\frac{3}{4}$ in. and $\frac{1}{2}$ in. objectives	54 00
No. 2553	Stand with 2 eyepieces and $\frac{3}{4}$ in., $\frac{1}{2}$ in. and $\frac{1}{4}$ in. oil immersion, (Series III) objectives	97 00

INVESTIGATOR MICROSCOPE.

The base is of brass and has the tripod form; pillar and arm of bronze, connected by a solid joint for inclination of body; rack and pinion for coarse adjustment, fine adjustment by our patent frictionless motion; main tube with two draw-tubes, one of which is graduated in millimeters, arranged with cloth lining. The stage lies in the same plane as center of movement for mirror, is of bronze and has concentric, revolving motion with removable clips.

The mirror-bar swings upon its bearing to any obliquity below and above the stage. It is provided with a sliding arrangement, whereby the mirror may be moved to and from the object. The mirrors are plane and concave and adjustable. The sub-stage is adjustable and provided with dome diaphragm. Steel pin for centering stage and sub-stage is provided with dome diaphragm. Steel pin for centering stage and sub-stage is provided.

Eyepieces are the Huguenian, objectives of Series II, unless otherwise stated.

Upright polished case with drawer for accessories and receptacles for eyepieces and objectives, with handle and lock, accompanies the outfit.

With every comple outfit (stand and objectives), we supply eyepiece micrometer No. 1734 free, this cannot be used on powers less than B or 1 in.

No. 2560*	Stand with 1 eyepiece (any power)	\$45 00
No. 2561	Stand with 1 eyepiece and $\frac{3}{4}$ in. and $\frac{1}{8}$ in. objectives	68 00
No. 2562	Stand with 1 eyepiece and 2 in., $\frac{3}{4}$ in. and $\frac{1}{8}$ in. objectives	74 00
No. 2563	Stand with 2 eyepieces, and $\frac{3}{4}$ in., $\frac{1}{8}$ in. and $\frac{1}{16}$ in. oil immersion, (Series III) objectives	117 00

NOTE.—Quotations on all microscopic accessories gladly furnished on application.

All instruments designated with a * are illustrated.

CONTINENTAL MICROSCOPE.

2570

This microscope is made of brass throughout, highly polished and lacquered. The base is of larger dimensions than any of the foreign instruments, and therefore more firm, particularly when the body is inclined. The stage is also of large size, thus allowing the use of culture slides without the danger of tilting; a groove is provided on its lower surface for the slide with cylinder diaphragms, for convenience called slide A. This slide may be replaced by another (slide B), carrying standard size sub-stage, arranged to be centered, provided with our dome diaphragm. To this may also be fitted any of our regular sub-stage accessories, particularly the series of sub-stage condensers. Fine adjustment is by large micrometer screw and works on the triangular bearing of the arm. The main tube has a draw-tube, which, when contracted, gives short standard of tube length with double nosepiece. The draw-tube may be extended and is graduated in millimeters.

No. 2570*	Stand with 1 eyepiece (any power)	\$35 00
No. 2571	Stand with 1 eyepiece and $\frac{2}{3}$ in. and $\frac{1}{4}$ in. objectives	57 00
No. 2572	Stand with 1 eyepiece and 2 in., $\frac{2}{3}$ in. and $\frac{1}{4}$ in. objectives	63 00

NOTE.—Quotations on all microscopic accessories gladly furnished on application.

Patent Plunger Hypodermic Syringe.

This has proven one of the most desirable patterns yet offered to the profession, and it is meeting with an increasing demand. The Syringe is adapted for either Liquids or Tablets, while the case is of fine Morocco, made flexible, and is fitted with metal needle and syringe holders, it contains 4 tablet vials, and as the case has soft and elastic corners and edges; it is particularly adapted for carrying in the vest pocket.

No. 2600 Hypodermic Syringe,
 \$2 00

2603

2602

2601

KOCK'S ASEPTIC HYPODERMIC.—The barrel can be easily removed, cleaned and sterilized. The absence of piston and oily packing and the ease with which the entire syringe may be cleaned and disinfected renders it desirable.

No. 2601* Kack's Syringe, each \$2 00

OIL CHAMBER HYPODERMIC SYRINGE with glass barrel, protected by a metal cylinder, open both sides, with graduations on piston rod, and cap on end to prevent drying out of plunger, in fine Nickel Case with Spring. Chamois Skin Cover.

No. 2602* Metal Case Syringe \$2 50

HYPODERMIC SYRINGE, has glass barrel, protected by a metal cylinder, open both sides, with graduations on piston rod, finger rests same as cut, and cap on end to prevent drying out of plunger, in Aluminum case with spring cover, containing 4 vials for tablets.

No. 2603* Hypodermic Syringe \$3 00

The Aluminum case hypodermic No. 2603 provided with a chamois cover.

HYPODERMIC.

2604

OFFICE FURNITURE.

No. 2804* Physician's Cabinet \$15 00
Solid Walnut or Oak.

No. 2805* Physician's Cabinet 25 00
Solid Walnut or Oak.

OFFICE FURNITURE.

THE HARVARD ROLL-TOP INSTRUMENT CABINET.

This Cabinet has unique features not heretofore found in a piece of furniture of this character, particularly the swinging shelves, six in number, which are pivoted at the front left corner. When the door is open each shelf may swing out independently of the others, turning upon its pivotal point. The illustration shows the Cabinet open with the lower shelf swung out. This is more desirable than the method heretofore adopted of using drawers, fixed shelves or a series of shelves all swinging together, as, in the method adopted by us, each shelf swinging independent of the others and being placed in the upper part of the Cabinet, the shelf may be readily inspected and any instrument selected without the necessity of stooping to look between the shelves, thereby saving in point of space, and making it much more convenient to distinguish any instrument in the Cabinet. On the six swinging shelves combined, is space for the reception of instruments equal to a table 30x44 inches. Each shelf has a flange surrounding it, the lower ones being deeper than the upper ones to prevent the instruments from falling off. The shelves are covered and the whole interior of the Cabinet above the drawers is lined with Hartford plush.

The swinging shelves are placed in the upper part of the Cabinet, the lowest swinging 27 inches from the floor.

The Cabinet mounted upon casters is 4 feet 4½ inches from the floor to top, not including in this measurement the ornamental railing or the roll-top. Width of the front, 25 inches. From the front to the back, 18½ inches. From the floor to top of ornamental railing, 5 feet 4½ inches.

The Cabinet has five drawers, as illustrated, the lower drawer being 16½ inches wide, 15½ inches from front to back, and 5½ inches deep; the second drawer from the bottom is 16½ inches wide, 15½ inches from front to back, 2½ inches deep; the third drawer from bottom is 16½ inches wide, 15½ inches from front to back, 4¼ inches deep. The double upper drawers are each 7¼ inches wide, 15½ inches from front to back, 2½ inches deep.

Each drawer is provided with a flange setting in front of the opening, thus making them as nearly as practicable dust-proof. The drawers are made of hard wood finished inside and out and are fitted with Yale locks, one key opening the door or either of the drawers.

STYLE OF FINISH.

We are prepared to furnish them in Antique Oak, 16 Century Oak, Cherry or Black Walnut.

These Cabinets are also manufactured without the roll-top and with an ornamental railing in place thereof. This style, while made of good stock and first-class in every respect, is not as finely finished as those listed below, nor are the drawers provided with the Yale locks, and they are furnished at correspondingly lower prices, \$33.00, \$35.00, \$37.00 and \$40.00 respectively for Style 3, with Panel Door, Style 5, with Plain Glass Door, Style 7, with French Plate Glass Door and Style 9, with French Plate Mirror Door.

OPERATING CHAIRS.

The Improved Yale Surgical Chair.

Fig. 1.
DORSAL POSITION.

Fig. 2.
SEMI RECLINING POSITION.

It has no equal in range of movements and positions and ease of adjustment.
It embodies utility, beauty, convenience and durability.

Each chair is supplied with the most complete stirrups for gynæcological practice, also with the Gould head-rest, which is universal in its adaptations for the aurist and oculist. No other chair can compare with the Yale in completeness, strength, adaptation, convenience and finish. We challenge competition, and solicit an investigation of its merits.

Hundreds sold every year, and every one giving the best of satisfaction, is the best evidence that they are not only the best, but are just as represented. Do not be deceived in buying any other that is "just as good" as the Yale; it cannot be done. We have features in the Yale patented to us, that no one else can use. Decidedly the best chair on the market for the price.

OFFICE AND HOSPITAL FURNITURE.—WHEEL TABLE.

2835

Wheel Table, showing top partly removed from frame. The entire frame is wrought iron iron axles, and finished in black throughout. The stretcher is capable of carrying a weight of 500 lbs. Length, 6 feet; width, 2 ft. 2 in.; height, 2 ft. 10 in. Will pass through a 28 inch doorway.

No. 2835* \$35 00

COLUMBIA OPERATING AND EXAMINING TABLE.

The Cut illustrates the Columbia Operating and Examining Table. It has two large and four small drawers, which can be drawn out on either side; also sliding board for basins. Finished handsomely, and is an exquisite piece of furniture.

No. 2840* \$30 00

2840

**OFFICE and HOSPITAL
FURNITURE.**

**Small Aseptic Surgical
Ward Bedside Table.**

With heavy plate glass top
and skylight glass shelf. Size,
width 14 inches, length 18 inches,
height 30 inches. Finished in
white enamel.

No. 2845* Aseptic Ward
Table \$10 00

Glass Top Operating Table.

5 feet 6 inches long, 2 feet 4 inches wide, 3 feet high. Weight, 270 lbs.

The top of table is made of two plates of one inch smooth glass placed on an angle so that fluid of all kinds will run to the center and drop into the copper trough underneath, and thence to the waste pail below.

The frame is made of wrought iron, finished in white enamel, and mounted on double wheel casters, and can be moved about easily.

The special advantages claimed for this table are firmness and cleanliness. The glass plates can be removed by simply lifting them from the frame. The special feature of this table is the caring for fluid of all kinds, by means of the slanting glass plates in connection with the center trough.

No. 2850* Glass Top Operating Table \$70 00

HOSPITAL FURNITURE.

2865

Invalid Lifting Machine for Hospitals.

Frame 7 feet long by 7 feet high.

The lifter can be used over any bedstead. It is made of gas pipe, hence very light and strong. Fixed double wheel castors are used. The back rest used on the lifter can be attached to any of our iron bedsteads at a small cost. The lifter is shipped K. D., and is easily set up with right and left hand sockets.

DIRECTIONS FOR USING LIFTER. Remove straps from one side of swinging frame over patient, then slip straps under him and buckle to the side bar. Place the machine over the bed and hook it on to the swinging frame, then raise patient by turning handle of windlass.

No. 2865* Hospital Lifter \$45 00
Price is f. o. b. factory.

HOSPITAL BEDS.

2870

Hospital Iron Bed.

Weight, (36 inches wide) 50 lbs.

Head and foot has fixed casters and is made of ½ inch gas pipe, iron rods in head and foot enameled black. Bed bottom, woven wire mattress on hard wood frame, well varnished. Head and foot fold upon woven wire mattress, or when the bedding is used on top of it.

No. 2870*	Hospital Iron Bed, 2 feet 6 inches wide	\$ 4 50
No. 2871	" " " 3 feet wide	5 00

2880

With Adjustable Woven Wire Mattress.

Weight, (6 feet 3 inches by 3 feet) 75 lbs.

Head and foot made of ¾ inch gas pipe, with cross rods of ¾ inch round iron, black enamel. Bed bottom adjustable, with heavy fabric on hard wood frame, well varnished. All castings of best malleable iron. We make this bed with casters, as illustrated, or with iron flanges to fasten to the floor.

Head and foot easily fastened to bed bottom, so that no patient, however violent, can detach them.

We make this bed with an angle iron frame when desired.

DIRECTIONS FOR USING PAQUELIN'S CAUTERY

Pour in enough Benzine to saturate the sponge, and any surplus which the sponge does not hold pour out again. This must be observed carefully or the Benzine will be pumped into the combustion chamber instead of the gas and fill it with soot. If the Benzine is not employed in the condition indicated, and the care taken to observe the points herein pointed out, the instrument will fail to give proper results, involving at the same time the risk of damaging it, while, if the above directions are carefully complied with, every instrument will work satisfactorily for an indefinite period.

In all our Cauteries the reservoir for the Hydro-carbon (fuel) is made of nickle-plated metal, according to the improvements of the inventor (J. E. Lee, new style) and lined with a sponge.

No. 3000* Improved Raquelin's Cautery, complete \$20 00
Extra Cautery Points vary in price from \$6.00 to \$7.50 each.

The compactness of this instrument, combined with its completeness, makes it very desirable and convenient for outdoor practice. In the reservoir is concealed a sponge to receive the benzine.

In a Metal Reservoir pour in enough benzine to saturate the sponge and any surplus which the sponge does not hold pour out again. This must be observed carefully, or the benzine will be pumped into the combustion chamber instead of the gas, and fill it with soot.

No. 3001* Pocket Style, Paquelin's Cautery \$19 00

Edison 6 and 8 Cell Cautery Batteries.

Battery consists of either 6 or 8 type "W" cells contained in a handsome polished lead lined oak box mounted on castors, with lock and key. This battery, if desired, can be placed in a cellar or closet, and is connected to the rheostat with heavy wire leads.

OUTFIT COMPLETE:

Comprising 6 cells in box, combination lamp and cautery rheostat, in oak case with plate glass cover, cords, necessary connections, wiring and complete charge for battery.

- | | | |
|-----------|--|---------|
| No. 3085 | Edison Cautery Battery, complete, 6 cells | \$60 00 |
| No. 3086* | Edison Cautery Battery, complete, 8 cells | 70 00 |
| No. 3087 | Edison Cautery Battery, no Rheostat, 3 cells | 25 00 |

These batteries are also adapted for running small diagnostic lamps and motors, and for snare work.

5086

Feddern Cautery Battery.

I know of no cheap battery which will give better value or better results. It is only suited for light work.

3091

KIDDERS SUPERIOR ELECTRIC BATTERIES.

DISCOUNT 20 PER CENT.

(ALSO READ EMPHATIC WORDS SEPARATED.)

NOT HOW CHEAP BUT HOW DURABLE.

Investments are usually made with an Eye to profit.

To purchase an article simply because it may appear pleasant to the Eye; is an error.

Is the investment a profitable one, if it costs more to keep in order for 12 months than the original value of the apparatus?

What allowance is made for the loss of the use of the apparatus and cost of express transportation both ways, simply to have the maker adjust new plates.

A good apparatus should be constructed, so that new plates can be replaced by the operator.

Medical Apparatus should not be classed among toys; yet we find many batteries upon the market, at a price, far below the value of good mechanical toys.

FARADAIC APPARATUS.—*It is the length of wire in the coil that adds a therapeutic value, therefore the practitioner will meet disappointments in his treatments by using coils of short length of wire.*

All the leading Therapeutists recommend coils of great length: *How is it possible to get a great length of wire on a small spool?* As the coil is the important factor in the production of the desired current, it also governs the size of the case.

Select a battery that is free from crystallization, uniform in strength and does not require new fluid for many months.

Do not purchase a battery that "needs no repairs" ALL THINGS ARE NOT EVER-LASTING, and batteries no exception to the rule.

Batteries for operating Faradaic or Cabinet Apparatus should be of fluid form, so arranged as to prevent spilling of fluid.

Dry Batteries are numerous; and highly recommended for Call Bell and similar work, where the current is used but the fraction of a minute and then allowed to rest for a long time. *For operating Faradaic apparatus they are not as economical, as a short period, of closed circuit, on Dry or Hermetically sealed Batteries, would polarize the cells, FORCING THE PURCHASE OF NEW CELLS AT GREAT COST, to place all in good order; while under the same conditions, A FEW CENTS WOULD REPLACE NEW FLUID INTO A FLUID CELL and place it in first class condition.*

Which shall it be? Investigate thoroughly before purchasing.

Everything for the *Electro-Therapeutist*. A. P. CARY, 293 Main St., Dallas, Texas,
General Western Sales Agent.

KIDDER'S CELEBRATED BATTERIES—Continued.

Improved Faradaic Apparatus.

HIGH TENSION APPARATUS.

ABSTRACT FROM RECENT ARTICLES.

A. D. ROCKWELL, M. D.—*New York Medical Journal*, May 13th, 1893.

"The importance of distinguishing between induced currents of quantity and those of tension, and of rightly adapting these various qualities of current to morbid conditions, is beginning to be appreciated. I long ago called attention to the very remarkable difference in the effects produced by induced currents of quantity and those of tension when applied through the skin and the mucous membrane of the body—or, in other words, through high and low resistances. Currents of quantity of a tension so low as to be almost if not quite imperceptible when applied through the external parts of the body powerfully effect both sensory and motor nerves when applied to internal surfaces, and, per contra, tension currents hardly appreciable when used internally become unbearable when used externally. In fact, the extraordinary action of seemingly weak induced currents of quantity when applied to low resisting surfaces will hardly be credited without actual demonstration."

"It becomes, therefore, absolutely essential, in utilizing these currents of high tension and large quantity, that we be able to increase them by almost imperceptible gradations from zero to the maximum strength required."

"The continuous-coil apparatus ordinarily constructed comprised in a single helix all the merits of the separate-coil apparatus with its various and cumbersome helices, with the single exception of an inability in the beginning to yield a sufficiently slight current, especially when the so called quantity currents were used internally by the bipolar method. In the device which I have suggested and here present this difficulty has been successfully overcome."

The total length of the coil of this helix is 7,552 feet, with the following subdivisions." * * * *

This coil was made for me by the JEROME KIDDER MANUFACTURING COMPANY,
820 Broadway, New York, N. Y.

21 Various Combinations of
wire, equal to
21 Separate Spools.
Complete in case, 11½ in. long,
8½ in. wide, 9½ in.
deep.

Total Combination of wire in
helix, nearly 8000 feet.
These coils are highly recom-
mended by such prac-
titioners as
Rockwell, Goelet, Apertoti,
Tripier, and others.

A. H. COELET, M. D.—*New York Medical Record*, June 17th, 1893.

"At the first annual meeting of the American Electro-Therapeutic Association in 1891 I presented a paper embodying my view of the induced current, and suggested a combination of coils which from practical experience with this agent was considered particularly adapted to meet the requirements of gynecological work. Up to that time little attention had been paid to the construction of faradic apparatus, in this country at least. Every manufacturer wound his coils to suit his own peculiar idea, regardless of the physiological effect of the current produced. Dr. Jerome Kidder was the only manufacturer who recognized the importance of the different qualities and therapeutic properties of the induced current as derived from different sizes and lengths of wire, and was the pioneer in this work. His apparatus was not, however, fully appreciated."

I am pleased to observe that my suggestions have been favorably considered by those directly interested in electro-therapeutics, and that the subject is receiving more serious consideration than before. I am gratified also, to be able to state that the manufacturers are giving more attention to the details of the construction of their medical induction apparatus. * * * *

The advantage of this combination of secondary coils is that the variations of the current to be derived therefrom render it universally useful in applying this agent (in this form) to a greater variety of conditions than was ever possible with the old form of apparatus. The arrangement is such that the apparatus is adapted not only to gynecology, but to all classes of work where the induced current is employed. The importance of this subject will be more evident when I tell you that I believe this current to be of more practical value than the galvanic, and that it is not possible to obtain the desired results with the ordinary forms of faradic apparatus." *

"The combination referred to consists of No. 36 wire 1500 yards long; No. 32 wire, 800 yards long; No. 22 wire, 850 yards long and No. 18 wire, 100 yards long, with subdivisions."

A. P. CARY, General Sales Agent,
293 Main Street, DALLAS, TEXAS.

KIDDER'S CELEBRATED BATTERIES—Continued.

PORTABLE GALVANIC BATTERY.

With Patented Improved Attachments for Electing various Cells without interrupting the circuit when the side is moved. Important for many cases.

By removing one of the levers, the current is alternately closed and interrupted. Also the current can be thrown rapidly and alternately in opposite directions. These arrangements add a value to these batteries not possessed by any other manufacture.

Fig. 3225

Fig. 3225 illustrates the apparatus tipped back, the hydrostat removed showing the completeness of operation. The tray containing the jars can be instantly removed from the box, and carried to a convenient place for charging. No forcing of plates out of position by Hydrostat, preventing the immersion of plates. Each jar is single. No expensive apartment jars to be replaced, if a single jar is damaged.

Larger amount of element surface than any other make. Zinc and Carbon plates, each $5\frac{1}{4}$ inches long and $1\frac{1}{2}$ inches wide.

The amount of square surface of plates, represents volume of current.

Combined Batteries of portable form are more expensive, considering the same number of cells, and character of coil, than the same grade of goods of our make which are placed in separate cases.

- No. 3312 Dimensions, 7½ inchs long, 4 inches wide, 1½ inches thick. Made of soft seal grained leather, with pocket for papers, etc., slide and tuck on side. Contains 2 rows of one drachm vials on each side; 48 vials complete, each 4 45
- No. 3313 Same style and size as No. 3312, in red or black Russia leather, each 4 85
- No. 3314 Dimensions 7½ inches long, 4 inches wide, 1½ inches thick. Made of soft seal grained leather, with pocket for papers, etc., slide and tuck on side. Contains double row of one drachm vials, and one row of 12 three drachm vials; 36 vials complete, each 3 60
- No. 3315 Same style and size as No 3314, in red or black Russia leather, each 4 00

The following Cases, 3316 to 3321 inclusive, are 1 fold and made to fold flat so as to take up small space in the pocket.

- No. 3316* Dimensions 7¼x3¼x½ inches. Made of soft black sealgrain. Contains 1 dozen two drachm vials and bocket for powder papers, each 1 50
- No. 3317 Same as 3316. Made of red Russia leather 1 90
- No. 3318 Dimensions 7½x4x¾ inches. Made of soft black seal grain. Contains 1 dozen three drachm vials and pocket for powder papers, each 1 75
- No 3319 Same as No. 3318. Made of Russia leather, each 2 15
- No. 3320 Dimensions 9x4x¾ inches. Made of soft black seal grain. Contains 1 dozen four drachm vials and pocket for powder papers, each 2 00
- No. 3321 Same as No 3320. Made of red Russia leather, each 2 40
- No. 3322 Dimensions 9x4x2 inches. A three fold, red, long grain, pocket vial case, Contains 1 row 12 four drachm, 2 rows of 15 each three drachm vials, also pocket for powder papers, each 4 50

MEDICINE CASES.

3330

- No. 3330* Buggy and Hand Case. A substantial and well-made hand case, carrying a sufficient number of remedies for ordinary practice. This style of case is solid and well made, covered with black grained leather. Dimensions 10 inches long, 4½ high and 3 inches wide. Contains 8 six drachm bottles, 10 four drachm, and 12 two drachm bottles. This case is made to meet the demand for an inexpensive case, and one giving full value for the price, which has been brought to the minimum. No imitation or artificial leather used in its construction, and we feel safe in saying no similar case can be purchased for the same price. Price, each \$ 4 00
- No. 3331 Same as No. 3331, but made of cheaper material. Price, each 3 50

3335

- No. 3335* Dimensions, 9¼ inches long, 5½ inches high, 3¼ inches wide. Case is made of black seal grained leather. It is a first-class and durable case; Morocco loops for vials, pocket for powder papers, etc; small case for hypodermic syringe, another same size for sundries. Also has graduated minimum measure. Contains 8 one oz., 24 four drachm, 13 one and one-half drachm vials. Case has loops inside cover of case, covered by flap, for instruments. Price, each 8 50
- No. 3336 Made like No. 3335, but of solid leather stitched, rivited and rings for straps. Price, each 10 50

3339—Closed.

3339—Open.

- No. 3339* Dimensions, 10¼ inches long, 5½ inches high, 4½ inches wide. Contains 24 four drachm vials, 7 two ounce glass stopper bottles. Pockets for small instruments or powder papers. Price, each 6 25

MEDICINE HAND CASES.

ESPECIALLY ADAPTED TO CITY PRACTICE.
Patent Silver Plated Metal Spring for Holding Vials.

3340

- No. 3340* Size 10¾ inches long, 6½ inches high, 2¼ inches thick. Contains 36 three drachm vials, held by silver plated metal springs. Has double handles. Mounted with nickle corners and nickel catch. Covered with best black seal grain leather and leather lined. The inside has supply box for Hypodermic Syringe, etc., ⅝ inches deep, 2½ inches wide and 10 inches long. For city practice this is one of the most compact and neatest cases on the market. Price, each \$ 7 25
- No. 3341 The same construction as No. 3340. Contains 12 one ounce and 12 three drachm vials, with supply box same size as in No. 3340. Price, each . . 7 25
- No. 3342 Same construction as No. 3340. Contains 24 three drachm and 7 one ounce vials, with supply box ⅝ inches deep, 3½ inches wide and 5½ inches long. Price, each 7 25
- No. 3343 Same construction as No. 3340. Contains 48 three drachm vials, but no supply box. Price, each 7 25
- Physicians using tablets, pills or parvules will find these cases particularly convenient as the bottles have mouths of good width.

Cabinet Medicine Bag.

3345

- Dimensions—5½ inches wide, 6 inches high and 11 inches long. Made of best black Seal Grain Bagstock, leather covered steel frame with nickel trimmings. Contains—22 1 ounce and 23 3 drachm vials, pocket for powder papers, and space 2x6x11 inches for sundries. The advantages of this bag are, that the partitions holding the vials are entirely removable, thus allowing the bag to be used for traveling, or for carrying instruments, when so desired. It is also the most genteel looking Physician's Case, being devoid of all nickel trimmings, such as corners, etc., ordinarily found on Medicine cases. Above all, it is substantially made, and with ordinary care will last a good many years, answering, as before stated, for several purposes—a feature highly to be appreciated by the physician.
- No. 3345* Price, each \$10 00
- No. 3346 Same as No. 3345, but 10 inches long, and containing 26 4 drachm and 26 2 drachm vials, and space for sundries 2x3x10 inches. Price, each 10 00

MEDICINE CASES.

THE IMPROVED LEADER.

3350

Is fitted with Comstock patent silver plated springs for holding bottles, to prevent corrosion; Captain improved combination corners (Patented August 15, 1892); Metal covered Flanges at head of corks, preventing same from coming out and spilling contents, Nickel spring lock with key, and Nickel name plate.

It is thoroughly dust proof. Is made of extra heavy black grained waterproof leather (cowhide), stitched around the edges and lined with thoroughly durable material.

The Leader contains 5 two and one-half ounce bottles, 26 three drachm, and 26 one ounce vials, and space for powder papers, loops for instruments, etc. Dimensions, 12 inches long, 6½ inches high, 5 inches wide.

No. 3350* Price, each \$ 7 50

3353

Dimensions 10¾ inches long, 6½ inches high, 4 inches wide. The outside of case is covered with solid leather, stitched, leather lined throughout. Mounted with German silver corners, nickel catch and nickel band around the case, making a most rich and substantial looking case. Has two handles. Contains one row of 12 one ounce bottles; two rows each of 12 three drachm bottles; 3 only, two and one-half ounce bottles, and space for sundries 5½x5½ inches and 1 inch deep. The vials are held in the case by silver plated metal springs, which have proven such a boon to the physician.

No. 3353* Price, each \$ 8 50

No. 3354 Construction same as No. 3353. Contains 2 rows each of 12 one ounce bottles; 3 two and one half ounce bottles, and space for sundries 5½x5½ inches and 1 inch deep Price, each 8 50

No. 3355 Construction same as No. 3353. Contains 4 rows each of 12 three drachm bottles, 3 two and one half ounce bottles, and space for sundries 5½x5½ inches deep. Price, each 8 50

No. 3356 Same as No. 3353, but cheaper material; stiched edges. Price, each . . . 6 25

All instruments designated with a * are illustrated.

“NANCY HANKS” VETERINARY CASE.

3360

Dimensions 13½ inches long, 8¾ inches high, 8¼ inches wide. Contains six 8 ounce, eight 4 ounce, nine 2½ ounce, and eight 1 ounce wide mouth bottles, with covered supply box 8x7½x2 inches. The outside is made of extra heavy black, grained, waterproof leather (cowhide)stitched around the edges and substantially lined. The entire case is made with special view to durability, compactness, convenience and cleanliness.

No. 3360* Price, each \$11 25

3365—Closed.

3365—Open.

Made of best black seal grained leather, steel covered frames, nickel spring lock with key, name plate, etc. Dimensions, 10 inches long, 5 inches high, 3¼ inches wide. Contains 10 four drachm, 12 three drachm, 28 two drachm vials; has loops for instruments on back of one of the side partitions.

No. 3365* Price, each \$ 9 00

3369

Dimensions, 8½ inches long, 5 inches high, 3¼ inches wide. Case is made of solid leather, hand stitched. Contains 5 two ounce glass-stopper bottles, 7 six drachm, 9 four drachm vials, sole leather case, with two nickel clasps, bottles arranged in three rows, with pocket for powders, etc.

No. 3368* Price, each, without strap \$ 4 75

No. 3369 “ “ with strap and rings 5 00

DIRECTIONS FOR MEASUREMENT.

These goods are of the best possible quality and, being manufactured expressly for each customer the day the order is received, we can guarantee a perfect fit and goods that are actually fresh. Parties who have had trouble in obtaining either serviceable stockings or good fitting ones are requested to give us a trial.

For an Abdominal Belt—Circumference at K, L, M, and width (from K to M) in front.

For an Arm Piece—Circumference at 4, 5, 6. Length from 4 to 6.

For an Ankle—Circumference at A, B, C. Length from sole of foot to C.

For a Garter Legging—Circumference at C, D, E. Length from C to E.

For a Garter Stocking—Circumference at A, B, C, D, E. Length from sole of foot to E.

For a Half Thigh Legging—Circumference at C, D, E, F, G, H. Length from C to F and from F to H.

For a Half Thigh Stocking—Circumference at A, B, C, D, E, F, G, H. Length from sole of foot to F and from F to H.

For a Knee Cap—Circumference at E, F, G. Length from E to G.

For a Knee Legging—Circumference at C, D, E, F, G. Length from C to F and from F to G.

For a Knee Stocking—Circumference at A, B, C, D, E, F, G. Length from sole of foot to F and from F to G.

For a Mitten—Circumference at 1, 2, 3. Length from 1 to 3.

For a Shoulder Cap—Circumference of chest at T; circumference under axilla and over shoulder at S and from axilla over shoulder at R; circumference of arm 3 inches below axilla.

For a Thigh Knee Cap—Circumference at E, F, G, H, I. Length from F to I.

For a Thigh Legging—Circumference at C, D, E, F, G, H, I. Length from C to F and from F to I.

For a Thigh Stocking—Circumference at A, B, C, D, E, F, G, H, I. Length from sole of foot to F and from F to I.

For a Thigh Piece—Circumference at G, H, I. Length from G to I.

For an Umbilical Belt—Circumference at L.

For a Wristlet—Circumference at N, O, P. Length from N to P.

ARNOLD STEAM STERILIZERS FOR PHYSICIANS,
HOSPITALS AND LABORATORIES.

These Sterilizers are inexpensive, and maintain an unvarying temperature of 100°C (212°F) in all parts of the Sterilizing Chamber without needing any care or attention. For this reason they are rapidly displacing all other methods heretofore employed by prominent institutions throughout the country. They are also used extensively by physicians in their offices for sterilizing instruments, bandages, dressings, clothing, etc.

The Instrument Sterilizers are furnished with two Perforated Racks, or one Perforated Rack and one Zinc Tray for Sterilizing Instruments in a solution of Carbonate of Soda and water, which prevents their rusting.

We have not the room here to print the names of many who are using these sterilizers, but the standing of the following institutions who have bought them without any solicitation on our part is a guarantee of their efficiency.

Harvard University.
Mass. School of Technology.
Yale University.
College of Physicians and Surgeons, New York City.

University of Pennsylvania.
John Hopkins University.
U. S. Marine Hospitals of New York, Cleveland, New Orleans, etc.
Medical Depart., U. S. Army, 125 Sterilizers.

DESCRIPTION.—Water is poured into the pan or reservoir, whence it passes slowly through three small apertures into the shallow copper vessel beneath, becomes converted into steam and rises through the funnel in the center of the Sterilizing Chamber above. Here it accumulates under moderate pressure at a temperature of 212°F. The excess of steam escapes about the cover, becomes imprisoned under the Hood and serves to form a steam jacket between the wall of the Sterilizing Chamber and the Hood. As the steam is forced down from above and meets the air, it condenses and drips back into the reservoir.

GENERAL PURPOSE STERILIZERS—Sizes of Sterilizing Chambers and Prices.

					Heavy Tin Copper Bottom.	All Copper.
No. 3684*	Height, 7 1/4 in.,	Diameter, 8 1/2 in.			\$2 50	\$ 7 00

No. 3686	" 11 1/2 "	" 10 1/2 "			3 50	9 00
No. 3687	" 12 1/2 "	" 11 1/4 "			4 00	10 00

SPECIAL INSTRUMENT STERILIZERS—Oval in Shape. Fitted with Two Racks, or One Rack and One Zinc Tray.

No. 3688*	Height, 6 in.,	Length, 14 in.,	Width, 9 1/4 in.		5 00	12 50
No. 3689	" 7 "	" 16 "	" 10 1/2 "		6 00	15 00
No. 3690	" 8 "	" 18 "	" 12 "		7 00	17 50

FAMILY SIZES—For Sterilizing or Pasteurizing Milk

No. 3691*	Heavy Tin, Copper Bottom, with rack and 7 bottles	3 00
No. 3692	" " " " " " 8 "	3 50

Extra Bottles, 75 cents per dozen; Bottle Racks, 50 cents each.
Croup attachments, with 10-inch tube, 30 cents each. Additional lengths, 10 cts. each.
If warm weather, and for most babies, sterilizing (212°F.) is recommended. In cold weather, or when a pure quality of very fresh milk can be obtained, pasteurizing (160°F. to 170°F.) is preferred by some physicians.

DEFORMITY APPARATUS.

I am prepared to make Deformity Apparatus of every description upon short notice. Physicians can send me their patients with the assurance that they will get exactly what each special case requires. I am prepared to make Artificial limbs, to make and repair Trusses, etc. My Truss department is in the hands of a competent man and all my Deformity Apparatus is made by the most expert workmen in the South. Twenty-five per cent discount will be given physicians from list prices. If I do not list the appliance you want order from any catalogue and I can make at once.

Fig. 1.—Dr. Chas. F. Taylor's Apparatus.

FOR POSTERIOR CURVATURE OF THE SPINE
WITH ATTACHMENT FOR DISEASED
CURVICAL REGION.

No. 3750 Price to Patients \$30 00 to \$50 00

Directions for Measurements.

1. Give as full particulars of the case as is possible, whether the curve is to right or left, and, if convenient, a plaster cast of the patients back; if not possible, take a piece of soft lead, mould it to the back, being particular to give all the indentations or prominences caused by the disease covering the full length of the spine, and trace the curves on a paper to be sent with order; circumference of the body between crest of the ilium and axilla.

2. Circumference of body one inch below crest of ilium.

3. Distance from center of one scapula to center of the other.

For the additional attachments controlling the cervical portion of the spine, give the following measurements.

4. Vertebra prominens to base of head.

5. Circumference from vertebra around chin, giving particulars as to formation of inferior maxillary.

Twenty-five per cent discount to physicians.

Fig. 1

Fig. 2.—MARKOE'S BRACE FOR TOPTICOLLIS.

Fig. 2

No. 3751 To Patients, according to size and finish, \$35 00 to \$45 00

DIRECTIONS FOR MEASUREMENTS.

1. Patient's age and weight.
2. Distance from sacro lumbar articulation to vertebra prominens.
3. Distance from sacro lumbar articulation to base of skull.
4. Circumference of pelvis, one inch below iliac crest.
5. Circumference of chest under axilla.
6. Circumference of the head.

TIEMANN CO'S. BRACE FOR LATERAL CURVATURE.

No. 3752 Price to Patients \$35 00

To the pelvic belt are attached, laterally, two elastic crutches, so as to relieve the spine of the weight of the trunk. Posteriorly, a single, strong, upright bar, holding a couple of adjustable pads for the scapulae, and just below a leather band of proper width, terminating in strong elastic India rubber webbing. This band is passed around the protuberance obliquely, and buckled to the pelvic belt in front, an inch or two beyond the linea alba.

DIRECTIONS FOR MEASUREMENTS.

1. Patient's name and sex.
2. Patient's age.
3. Patient's weight (estimated).
4. Distance from sacro lumbar articulation to vertebra prominens.
5. Distance from sacro lumbar articulation to first vertebra involved.
6. Distance from sacro lumbar articulation to last vertebra involved.
7. Distance from crest of ilium to axilla right side.
8. Distance from crest of ilium to axilla left side.
9. Distance from the center of one scapula to the center of the other.
10. Horizontal (transverse) diameter of the protuberance.
11. Circumference of chest under axilla.
12. Circumference of pelvis one inch below the iliac crest.
13. In additions to the above measures, please state if the convexity of the curve is to the right or left side.

Twenty-five per cent discount to physicians.

All instruments designated with a * are illustrated.

Fig. 4.—Chas. F. Stillman's Chicago Brace for Pott's Disease.

No. 3753 Price to Patients, without head or chin rests \$40 00 to \$50 00

Fig. 4.

- 1. Sex of patient.
- 2. General appearance of patient.
- 3. Lay a soft piece of lead wire along the back, moulding it exactly to the spine, from the seventh cervical vertebra to the middle of the sacrum. With this pattern, trace carefully the shape of the spine on a sheet of paper, making the points opposite the upper and lower borders of the scapula and the crest of ilium.
- 4. Circumference of body between crest of illium and trochanter major.
- 5. Circumference of body at waist.
- 6. Circumference of body under axilla.
- 7. Distance between the lower borders of the scapulae.

If chin or head rests are required give additional measures.

- 1. Distance, if any, from top of brace to vertebra prominens.
- 2. Distance from same point to top of skull.
- 3. Circumference of head and chin.
- 4. Lateral diameter of head and chin.
- 5. Antero-Posterior diameter from chin to back of neck.
- 6. Take a piece of bar lead and get outline of back and neck, and show same on paper.

In ordering the above shoes, please send the following measurements:

- 1. Length of sole of foot Inches.
- 2. Circumference of calf "
- 3. " of instep "
- 4. " of ball of foot "
- 5. " above ankle "
- 6. Length from sole to upper part of calf "
- 7. Right, left or both feet?
- 8. Talipes varus or valgus?

Fig. 39.—Sayre's Improved Ball and Socket Clubfoot Shoe.

Fig. 39.

and not so clumsy as the primitive clubfoo shoe, the upper leather adapts itself more perfectly by lacing than if arranged with straps and buckles. This shoe is pictured above as arranged for valgus or varus. There is really no essential difference, only observe the principle to apply the artificial muscles in such position as shall supply the place of those paralyzed.

No. 3807	Price to patients, of a single shoe	\$10 00 to \$14 00
No. 3808	Price to patients, of a pair of shoes, complete, according to size . . .	\$20 00 to \$28 00

This consists of a cushioned iron cap to receive the heel, the leather covering of which is carried over the instep and ankle, and fastened by lacing. Elastic tubing (N) to go in front of the ankle joint to futher secure the heel in position, and fastening at (C) an iron hook on outside of heel cap. Sole of shoe (D) cushioned, and laced securely in front of the metatarsal articulation. Ball and socket joint (E), connecting sole with heel. Elevated plate of iron (F), properly cushioned to make presure against base of first metatarsal. Steel bars (G), connecting the shoe with strap (H), to go around the calf. Joint (K), opposite the ankle. Stationary hooks (L), opposite the toes, for attaching the India rubber muscles (M M M). These India rubber tubes have chains attached and are for the purpose of making flexion and eversion.

This shoe has been made more comfortable and convenient by a slight heel, and by making the upper leather nearly like that of an ordinary shoe,

DIRECTIONS FOR MEASUREMENT.

- 1. Length of sole of foot Inches.
- 2. Circumference of calf "
- 3. " of instep "
- 4. " of ball of foot "
- 5. " above ankle "
- 6. Length foom sole to upper part of calf "
- 7. Right or left foot?
- 8. Talipes varus or valgus?

Twenty-five per cent discount to physicians.

- 1. Height of the extension as directed for Fig. 42 . Inches
- 2. Right or left leg?
- 3. Distance from sole to ankle joint.
- 4. Distance from sole to calf Inches
- 5. Circumference of calf "
- 6. Send us well-fitting laced shoe.

Fig. 42.

If we are to furnish shoes, send the following measure:

- a. Length of sole of foot Inches
- b. Circumference of ball of foot "
- c. " of instep "
- d. " above the ankle "

Shoes are charged extra, according to quality. Twenty-five per cent discount to physicians.

THE EMPIRE ELASTIC BANDAGE

SPECIALY ADAPTED FOR

VARICOSE VEINS.

We invite the attention of the Medical and Surgical profession to the various merits combined in the Empire Bandages:

1st. ITS POROSITY—The greatest in the "Empire" It never causes itching, rash or ulceration under the bandage.

2d. ITS ELASTICITY, which will enable the surgeon or nurse to put it on at any required tension, and which will follow a swelling up or down, as the case may be, a feature unknown to any other bandage.

3d. ITS ABSORBENT PROPERTIES - Greatest in the "Empire."

4th. ITS EASY APPLICATION to any part of the body, not being necessary to fold over, as with other bandages, as it follows itself with equal uniformity around any part of the abdomen.

5th. ITS SELF-HOLDING QUALITIES — No bother with pins, needles and thread, or string, so tiresome to surgeons, as simply tucking the end under the last fold insures its permanent stay, until its removal for purpose of cleanliness.

6th. The only Bandage that is SUPERIOR TO THE ELASTIC STOCKING for varicose veins.

Send \$1.00 for a 3 inch by 5 yard Bandage on approval.

THE EMPIRE ABDOMINAL SUPPORTER

Is Superior to all others for the following reasons:

1st. It adapts itself to every movement of the body, giving strong and even support.

2d. It produces warmth without irritation or sweating, as it is perfectly ventilated.

3d. In pregnancy, corpulency, tumors or other cases of enlargement of abdomen, it supports weight of body from the backbone, relieving the sinews of their overwork.

4th. Its easy appli-ance (lace and drawn over the head or feet.)

5th. It is cheap, durable. It can be washed when soiled, proper care being taken to cleanse in lukewarm water, and dry in the shade.

In ordering give the measure of the abdomen.

No. 1920

WE CALL special attention to our New Medicine Case, No, 1920, as illustrated. It is a good substantial case, covered with leather, containing 18 two dr. vials, 18 six dr. Vials, three 3-oz. bottles, also space for Hyperdermic Syringes, silk, etc. The price puts it in reach of any physician.

Price, \$4.50

The Aseptic Obstetrical Bag, No. 950.

Square, Cabinet Bag style, 5½ inches wide, 6 inches high, 15, 16 or 17 inches long. Opens on top; no gussets, hence no waste of space when closed. Made of best grade of bag leather, leather covered steel frame with full nickel trimmings, and lined with smooth leather, which allows the inside to be cleaned with a moist sponge whenever necessary, making the bag as near aseptic as an article of this kind can be made. It is the strongest, neatest, most cleanly and cheapest Obstetrical Bag of its kind on the market. It will outwear three of the ordinary bags.

TISSUE PAPER BETWEEN LAYERS.

DURING the past year we have added to our plant the most complete and latest Improved Cotton Machinery in existence for the production of ABSORBENT COTTON on a vast scale by all the modern processes for handling and perfecting this article; it is safe to say *that the quality of our Absorbent Cotton exceeds that of any other maker*, at prices which defy competition.

CAUTION! Be on your guard when some of our competitors tell you our packages do not contain one pound, as they are endeavoring to mislead you. *We base our prices on a pound including the weight of the tissue paper.* If you want a full pound of Cotton and the Tissue Paper too, it will afford us great pleasure to put it up that way for you, at a cost not exceeding the cost of the tissue paper, which will be one cent per pound advance over the prices mentioned. **No one can furnish the tissue paper free**, it must figure somewhere in the cost of the cotton, and we think the most satisfactory way by far of doing it, is to weigh the tissue with the cotton, as that is usually the plan adopted by all manufacturers.

BEST QUALITY.	Size of Package	1 lb. per lb.	½ lb. per lb.	¼ lb. per lb.	2 ozs. per lb.	1 oz. per lb.
1 Plain Absorbent, with or without tissue paper . . .		\$ 30	\$ 35	\$ 40	\$ 45	\$ 50
2 Borated		40	45	50	55	60
3 Carbolated		40	45	50	55	60
4 Corrosive Sublimate		40	45	30	55	60
5 Salicylated		70	80	85	95	1 00
10 Plain Hospital Grade, with tissue		28	30	32	35	40
12 Plain Egyptian, long silken fibre		45	50	55	60	65

Above prices based on a pound of cotton including the tissue paper. If wanted put up a pound of cotton and the tissue too, (about 17½ ozs. to the package) then add one cent per pound advance to cover cost of tissue.

SYRACUSE

SUSPENSORY

BANDAGE.

WITH SELF-ADJUSTING SLIDING LOOP AT BACK POUCH

The Pouch is supported by a Body Band, and also by a Leg Band which passes around the sides and back of legs and through the Sliding Loop at back of Pouch. The Sliding Loop plays freely on the Leg Band thereby allowing the Pouch to adjust itself as the movements of the body or clothing may require, consequently the Suspensory fits perfectly and gives best possible support no matter what position the body may assume. The LOOP is protected by a Cloth Shield which prevents any pinching on account of the play of the Leg Band through the Loop,

SOLUBLE COMPRESSED
HYPODERMIC TABLETS.

ALL OF OUR HYPODERMIC TABLETS COMPRESSED WITHOUT FOREIGN ADMIXTURE, EXCEPT WHEN THE BULK OF THE MEDICAMENT IS LESS THAN ONE-TWELFTH OF A GRAIN.

Recent improvements in our Hypodermic Compressing Machines, enable us now to manufacture these tablets entirely free from any foreign material, thus insuring immediate solution and FREEDOM FROM ALL POSSIBILITY OF LOCAL IRRITATION.

We claim for our Hypodermic Tablets: *Absolute Accuracy of Dose, Ready and Entire Solubility, Perfect Preservation of the Drug.* Their convenience and utility will at once be apparent on examination.

We give below Price List of Soluble Compressed Hypodermic Tablets most frequently ordered. They are put up in cases of ten tubes, each tube containing twenty tablets; also, in bottles of 100 each.

Dental Work Desk.

DENTAL WORK DESK OPEN.

We have lately added to our DENTAL GOODS a neat Office Work Desk,
which is as useful as ornamental, and particular recommend it to

Dentists who are **CROWDED**
FOR ROOM.

We make them in Solid Walnut and Atique Oak.

The total height is 45 inches, width 30 inches, depth 20 inches.

The desk part is 15 inches, consists of one shelf and two drawers. The drawers are 17x14½; depth 3 inches.

It also has a gas pipe, which can be connected by rubber tubing with the gas fittings in office.

A neat folding top can be lowered and locked when not in use.

MADE BY R. BOERICKE & CO., CHICAGO, ILL.

Physician's Cabinet

We desire to call attention to our new styles of PHYSICIANS' CABINET as shown in cut. It is a very tasty and convenient piece of furniture for office use, specially manufactured for the use of the Gynecologist, Surgeon, Oculist, Dentist, and the general practitioner.

It has a neat and convenient top with shelves (see cut). Top space has a row of nice plated clamps for holding inhalent bottles; below there are two open shelves for keeping bottles, etc.; in bottom are drawers, etc., as shown in the cut.

We make them in Antique Oak and Walnut. Mountings are Nickel Plated. Boxwood Castors.

Height of Cabinet to railing,	63	inches.
Width	28	"
Depth	16	"

Physicians' Cabinet—Open. With Top Shelves.

495-503 WELLS STREET,

Send for Descriptive Catalogue.

CHICAGO, ILLS.

DESCRIPTION:—Water is poured into the pan or reservoir, whence it passes slowly through three small apertures into the shallow copper vessel beneath, becomes converted into steam and rises through the funnel in the center to the Sterilizing chamber above. Here it accumulates under moderate pressure at a temperature of 212° F. The excess of steam escapes about the cover, becomes imprisoned under the Hood, and serves to form a steam jacket between the wall of the Sterilizing Chamber and the Hood. As the steam is forced down from above and meets the air it condenses and drips back into the reservoir.

GENERAL PURPOSE STERILIZERS.

Sizes of Sterilizing Chambers and Prices.

	Height.	Diameter.	Heavy Tin Copper Bottom	All Copper.
No. 2,	7½ inch,	8½ inch,	\$2.50	\$7.00

In warm weather, and for most Babies, Sterilizing (212° F.) is recommended. In cold weather, or when a pure quality of very fresh milk can be obtained, Pasteurizing (160° F. to 170° F.) is preferred by some physicians.

Manufactured only by **WILMOT CASTLE CO., Rochester, N. Y.**

SOLD BY A. P. CARY, DALLAS, TEXAS.

Improved "YALE"

THE IMPROVED "YALE" SURGICAL CHAIR.

HIGHEST AWARD WORLD'S FAIR, OCT. 4TH, 1893.

Fig. I—Semi-Reclining.

- 1st. Raised by foot and lowered by automatic device.—Fig. I.
- 2nd. Raising and lowering without revolving the upper part of the chair.—Fig. VII.
- 3rd. Obtaining height of 39½ inches.—Fig. VII.
- 4th. As strong in the highest, as when in the lowest position.—Fig. VII.
- 5th. Raised, lowered, tilted or rotated without disturbing patient.
- 6th. Heavy steel springs to balance the chair.
- 7th. Arm Rests not dependent on the back for support.—Fig. VII—always ready for use; pushed back when using stirrups—Fig. XVII—may be placed at and away from side of chair, forming a side table for Sim's position.—Fig. XIII.
- 8th. Quickest and easiest operated and most substantially secured in positions.

- 9th. The leg and foot rests folded out of the operator's way at any time —Figs. XI, XV and XVII.
- 10th. Head Rest universal in adjustment, with a range of from 14 inches above seat to 12 inches above back of chair, furnishing a perfect support in Dorsal or Sim's position.—Figs. XIII and XV.
- 11th. Affording unlimited modifications of positions.
- 12th. Stability and firmness while being raised and rotated.
- 13th. Only successful Dorsal position *without moving patient*.
- 14th. Broad turntable upon which to rotate the chair, which cannot be bent or twisted.
- 15th. Stands upon its own merits and not upon the reputation of others.

Fig. XVII—Dorsal Position.

Pronounced the *ne plus ultra* by the Surgeon, Gynecologist, Oculist and Aurist.

.. Surgical Chair. .

THE HARVARD CABINET

HIGHEST AWARD

WORLD'S FAIR.

MODERN Surgery demands modern appliances, and to that end, The Harvard Instrument Cabinet has been designed, especially for physicians and surgeons. The unique features of this cabinet are characteristic of the operating office furniture manufactured by us. The independent swinging shelves which are pivoted to the front left corner, provide ample space for the instruments of the general practitioner or specialist. When the door is open, each shelf may be swung out, independent of the other. This is more desirable than the method heretofore employed of using drawers, fixed shelves, or a series of shelves all swinging together. Any shelf may be readily inspected, and any instrument selected without the necessity of stooping to look between the shelves. The space for the reception of instruments on these shelves is equal, to a table 30x44 inches. Each shelf has a flange surrounding it, the lower ones being deeper than the upper ones, to prevent instruments from falling off.

The cut represents our style No. 17 X. The same as No. 7 X, except that the Cabinet has Roll Top.

20 STYLES TO SELECT FROM.

Little Rock, Ark., Mar. 26, 1894.
MR. H. G. BOWERS.
Agent of the Harvard Co.,
Canton, O.

Dear Sir: It gives me pleasure to tell you my opinion of the Improved Harvard Chair. Before I went to Chicago I had my mind fully made up to buy a chair, but not the Harvard. After spending two months there as JUDGE OF MEDICAL AND SURGICAL SUPPLIES, and after examining every chair and table on exhibition, I gave a practical exhibition of my opinion by ordering a Harvard Improved from you. I have been using the chair in my office since the 1st of October 1893, and am fully satisfied with it. I have not a fault to find nor an improvement to suggest.

If this letter is to be of any use to you the readers of it will need to know that this chair was not a gift to me but was bought and paid for.

Yours truly,

IDA J. BROOKS, M. D.
